PRESENTATION OVERVIEW

HYBRONN
Mobility that evolves with you

- Theoretical Framework
- Our Brand
- Market Overview
- Proposed Strategy
- Product Portfolio
- Defined KPIs
- Simulation Decisions
- Financial Overview
- Future Viability

PORTER'S FIVE FORCES

Moderate

High Barriers to Entry:

- Requires high capital investment
- Well-established brands
- Supply chain complexity (Bubna et al., 2016)
- **Economies of Scale**

Low Barriers to Entry:

- Shift towards EV
- Dealerships to D2C (direct - to - consumer) sales (Waas et al., 2023)

High

Competitors:

- Wide range of automotive brands across Europe (Eg: VW, Hyundai, Tesla, BYD, BMW, Mercedes Benz)

Basis of Competition:

- **Price:** Entry of Chinese Brands with lower costs
- **Technology:** Differentiating through battery performance, software & connectivity (McKinsey & Company, 2022)

High

- After Covid - 19: Semiconductor chip shortages provided suppliers with more power (McKinsey & Company, 2022)
- EV battery manufacturing is mainly concentrated in Asia due to better infrastructure → with rise in EV and emission regulations it provides suppliers with more leverage (Pfeiffer and Van De Staaij, 2019)

Low / Moderate

- Preferred mode of transport amongst Europeans is personal cars (86%) (Ipsos, 2025)
- With the rise in hybrid & EV models, along with growing environmental consciousness, cars would remain dominant in the market
- Public transport & soft mobility options are still attractive substitutes (Ipsos, 2025)

High

Multiple Options:

- Ability to compare multiple models

Price Sensitivity:

- High prices may deter potential buyers (eg: EV; fleet managers) (Venus, Schaufuss and Möller, 2024)

Switching Cost → Low:

- Charging infrastructure → becoming more available due to AFIR regulation of installing more charging points (Hooker, 2024)

(Porter, 1985)

EUROPEAN CAR INDUSTRY: PESTLE ANALYSIS

HYBRONN
Mobility that evolves with you

The European car market faces significant regulatory, environmental, and economic pressures, driving innovation and transformation -

Political

Strict EU emissions regulations (CO_2 targets for 2025+) and strong hybrid/EV policy support. (European Commission)

Technological

Rapid advancements in hybrid/EV powertrains, connectivity, ADAS and digital retail. (Deloitte, 2024)

Economic

Post-crisis recovery, inflation, and volatile consumer demand impact sales. Tax incentives boost electrified vehicles.(ACEA, 2025)

Legal

EU/national laws mandate hybrid/EV adoption, safety standards, and digital compliance, with penalties for non-compliance.(European Commission,)

Sociological

Rising eco-consciousness and demand for sustainable mobility, compact SUVs, especially among urban consumers.(Bhat et al., 2023)

Environmental

Ambitious climate-neutral targets (2030-2050) drive green manufacturing and high demand for hybrid models. (European Commission)

CONSUMER AND FLEET DYNAMICS

HYBRONN
Mobility that evolves with you

B2B (Fleet) Market

The B2B segment, particularly "true fleet registrations," is a major growth driver. Targets range from SMEs to large corporations, focusing on saloons, estates, SUVs, and compact cars, with a significant shift towards hybrid and electric vehicles (EVs).

Decision Drivers

Fleet managers prioritize Total Cost of Ownership (TCO), including purchase price, energy costs, maintenance, and residual value. Cost-efficiency and corporate sustainability goals are paramount, accelerated by regulatory pressure and tax incentives for EVs.(Capgemini, 2025)

B2C (Private) Market: Diverse Motivations

This fragmented segment targets individuals and households, defined by age, lifestyle, and income, demanding vehicles from urban cars to SUVs. (Bhat et al., 2023)

Younger Professionals (25-40)

Tech-savvy, eco-conscious, convenience-driven. Seek versatility, fuel efficiency, modern design, and are open to new mobility solutions.

Families (35-55)

Prioritize safety, space, and practicality for transporting family. SUVs and MPVs are popular for comfort and reliability.

Older Consumers (55+)

Value safety, comfort, and reliability. Often brand-loyal, less tech-driven unless for ease of use. May be downsizing.

KEY BEHAVIORAL TRENDS

HYBRONN
Mobility that evolves with you

Digital Engagement

Extensive online research, price comparison, and configurators define the customer journey, driven by convenience and transparency.(Deloitte, 2024)

Brand Loyalty Shift

Decreasing loyalty, especially among younger consumers open to new, tech-driven entrants from outside Europe. (Deloitte, 2024)

Eco-Consciousness

A dominant trend across segments, focusing on fuel efficiency, vehicle lifecycle, and a brand's overall sustainability commitment.(Bhat et al., 2023)

After-Sales Importance

Reliable service, including maintenance and software updates, is a key differentiator in the ownership experience.(Deloitte, 2024)

THEORETICAL FRAMEWORK

HYBRONN
Mobility that evolves with you

Theory	Application to European Automotive Industry
Resource Based View (Barney, 1991) • Sustained Competitive Advantage → Key Drivers: Resources (tangible asset) & Capabilities (intangible asset) • What does the company own / control that can't be copied by competitors	• **Brand Equity:** Strong brands (Volkswagen, BMW, Stellantis) → Strong Brand Loyalty • **Supply Chain & Manufacturing Needs:** Strong supplier relationships or capability to producing own supplies (Eg: BMW Engines) (BMW Group PressClub, 2021) • **R&D:** Long term R&D investment → faster innovation, first mover advantage (Koshksaray et al., 2023)
Red Ocean Strategy (Kim and Mauborgne, 2005) • Competition in existing markets with already defined boundaries • Focus: Outperforming competitors → cost leadership, low profit margins	• **Product Similarity:** Car models + compliance to regulations → lower differentiation • **New Entrants:** Chinese EV producers (BYD) entering European market → competition on price (Lahiri, 2024)
Blue Ocean Strategy (Kim and Mauborgne, 2005) • Avoid competition in existing markets by creating new / entering new untapped markets • Differentiation Focus: value innovation through differentiation, generate new demand & target non - customers	• **EV Market:** Attracted new market segment → eco-consious, tech-savvy, high income consumers. Tesla shifted attention from ICE market towards EV market • **Mobility Subscriptions:** Care by Volvo allowed customers to purchase a subscription to use a car without having to own it. Targeted urban professionals & young adults who wanted flexibility (Volvocars.com, 2020)

HYBRONN

Mobility that evolves with you

VISION

Advancing Europe towards sustainable mobility with secured investments

MISSION

To deliver reliable, sustainable, and future-ready mobility solutions for families and businesses across Europe

VALUES

- Sustainable Progress
- Future-Ready Innovation
- Trust & Reliability
- European Excellence
- Versatility & Comfort
- Digital Connectivity

PROPOSED STRATEGY

HYBRONN
Mobility that evolves with you

Core Idea

Hybronn is positioned around convenience and practicality in the transition to offer sustainable mobility solutions

Strategic Frameworks

Porter's Differentiation Focus (Porter, 1985): Hybronn's competitive edge comes from brand value built on reliability and innovation and not just cost, making us the trusted choice for hybrid customers and fleet managers (Murray, 1988; Islami et al. 2020)
Resource-Based View (Barney, 1991): Our unique strengths —Tangible (R&D, Production and automation capability), Intangible (Brand, Reputation and Ingress Protection (IP))
Blue Ocean Strategy (Kim & Mauborgne, 2005): Retrofit kits created uncontested space (ICE → HEV → BEV transition) [Grant Proposal to Govt.], Untapped market sectors (Unique age group and Unmet needs)

Strategic Objectives

- Penetrate hybrid market (fastest-growing EU segment)
- Differentiate on safety, comfort, digital tech, sustainability
- Achieve profitability by Year 3, scale leadership by Year 4

Competitive Scope

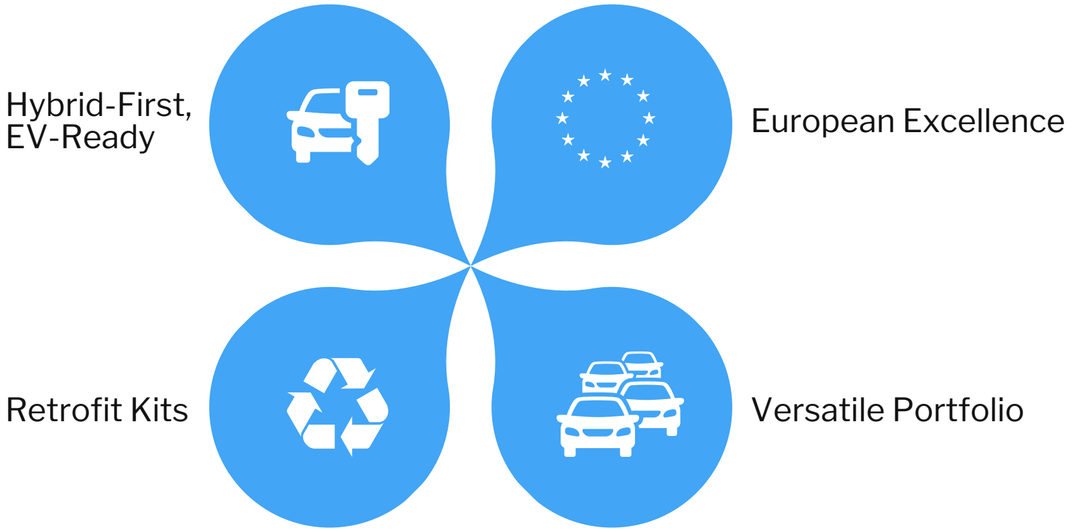

- Narrow: prioritizes high-value fleet and urban customers, rather than pursuing a broad-market strategy.
- Niche-focused differentiation and High-value segments

Strategic Rationale

Market Trends: EU regulations (Euro 7, ZEZ), rising hybrid demand (+19.6% in 2024) created urgency for hybrid-first solutions. (ACEA, 2025; Neves and Marques, 2025).
Consumer Needs: Fleets demanded compliance and uptime; urban professionals sought style, connectivity, and convenience (Fleet Europe, 2025; Geotab, 2022).
Gaps in Market: BEV adoption slowed (charging infrastructure gaps, high costs) → hybrids & retrofit kits positioned as bridge technology, Affordable compliance, Fleet decarbonisation (ACEA, 2025; Brown et al., 2021).

UNIQUE VALUE PROPOSITION

HYBRONN
Mobility that evolves with you

RESOURCE-BASED VIEW (VRIN)

Valuable

Retrofit kits,
Automation,
FleetOS

Rare

£50m grant,
Fleet-first positioning

Inimitable

Integrated tech
and software ecosystem

Non-Substitutable

Retrofit kits
(Unique bridge solution,
ICE → HEV → BEV)

(Barney, 1991, Kotler & Keller, 2016, Osterwalder et al., 2014)

STRATEGY FOLLOWED DURING THE SIMULATION

HYBRONN
Mobility that evolves with you

Year 1 – Foundation

Key Decisions

- Launched Volare (Medium SUV, B2B) for fleets and Forvia (Compact Crossover, B2C) for urban professionals which follows red ocean strategy
- Focused on safety, comfort, and hybrid-first features.
- Built brand credibility with compact, high-end vehicles.

Challenges

- Low productivity (<50%) as operations scaled.
- Gained only modest market share in early adoption phase.

How We Tackled Them

- Prioritised brand awareness marketing via Dealer Incentives, Television and Promotional offers
- Accepted slower start to focus on quality positioning.

Year 2 - Market Adaptation

Key Decisions

- Lowered prices to respond to shrinking market size and share drop.
- Maintained Volare & Forvia while investing in new model R&D (targeting 55+).
- Applied for retrofit kits government grant.
- Trend forecast (Ansoff, 1957)

Challenges

- Market downturn reduced demand.
- Pressure on margins after price cuts.

How We Tackled Them

- Used fleet incentives and promotions to protect share.
- Kept innovation pipeline consistent by preparing new models.

STRATEGY FOLLOWED DURING THE SIMULATION

HYBRONN
Mobility that evolves with you

Year 3 – Diversification & Innovation

Key Decisions

- Expanded portfolio with Veyra (small car for 55+, B2C).
- Introduced 3 models, aiming at multiple age groups.
- Secured £50m grant for retrofit kit production.
- Pushed automation to improve productivity.

Challenges

- Stock buildup (especially Veyra).
- Market growth lower than forecasted → pricing pressure.
- Resource strain from heavy R&D and automation investments.

How We Tackled It

- Balanced production levels to avoid future inventory risks.
- Refined promotions for individual consumer markets through targeted advertisements (TV, radio, Magazines/Newspapers)
- Learned importance of sequencing expansion (strengthen fleet/urban first before premium/value)

Year 4 – Consolidation & Leadership

Key Decisions

- Added Tialon (Premium SUV, 55+, B2C), expanding into premium space.
- Released 4-model portfolio (2 small, 2 medium).
- Strengthened alignment with mission: compact, high-end mobility.
- Repaid outstanding obligations to improve stability.

Challenges

- Slower uptake for Tialon created inventory carryover.
- Competitor intensity in premium segment.

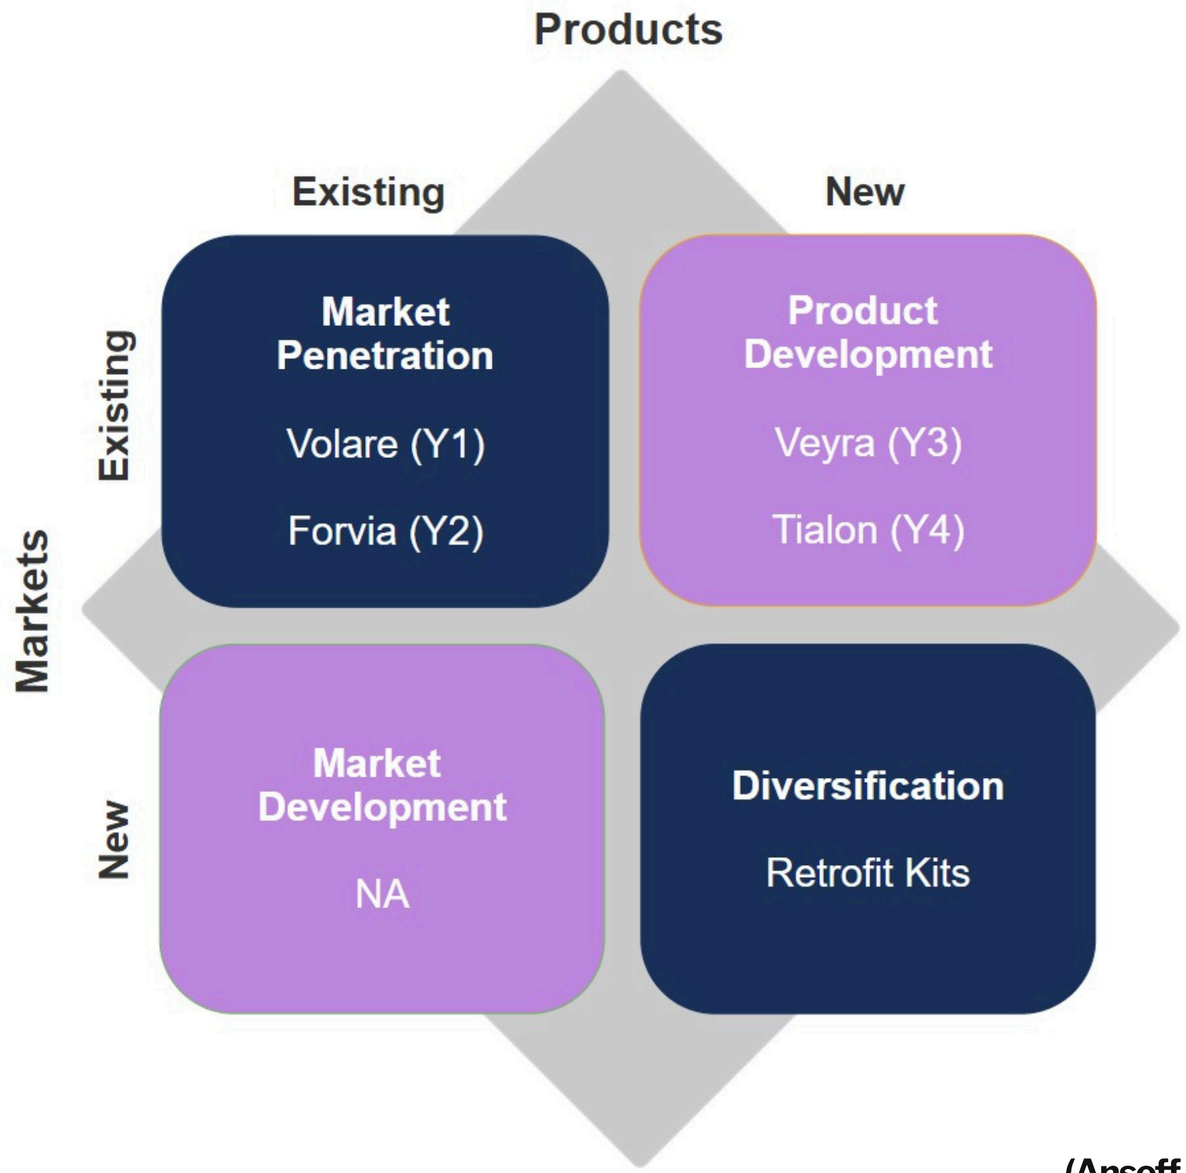

How We Tackled It

- Positioned Tialon with premium branding & selective promotions
- Focused resources on high-performing core models (Volare & Forvia)
- Reinforced Hybronn's image as trusted fleet & hybrid leader

ANSOFF MATRIX

HYBRONN
Mobility that evolves with you

(Ansoff, 1957; Meldrum & McDonald, 1995)

PRICING STRATEGY

HYBRONN
Mobility that evolves with you

VOLARE
VALUE-BASED PRICING

FORVIA
COMPETITIVE PRICING

VEYRA
PENETRATION PRICING

TIALON
PREMIUM PRICING

	VOLARE	FORVIA	VEYRA	TIALON
YEAR 1	(£36,999)	(£28,999)	-	-
YEAR 2	↘ (£33,999)	↘ (£26,999)	-	-
YEAR 3	↗ (£36,999)	↗ (£29,999)	(£28,999)	-
YEAR 4	↗ (£37,999)	↘ (£28,999)	↘ (£26,999)	(£39,999)

Initial Strategy: Position cars as high-end → pricing to reflect premium value.

Year 2 (Deviation): Prices reduced due to slowing market growth → short-term dynamic pricing.

Year 3 (Deviation): Slight price increase, but remained below premium levels → responding to competitive pressure.

Year 4 (Realignment): Returned to premium pricing → reinforcing original high-end strategy.

(Tellis, 1986; Hinterhuber, 2008; Kotler & Keller, 2016)

INVESTMENT STRATEGY

HYBRONN
Mobility that evolves with you

R&D Investment Strategy (Innovation-Driven Growth) (Gartner, 2025)

- Year 1 & Year 2 → Heavy focus on hybrid technology development, automation, and retrofit innovation.
- **Strategic intent:** Differentiate via technology rather than competing on price alone.

Capacity & Infrastructure Investment (Scaling Productivity) (McKinsey & Company, 2022)

- Year 1 → Investments in automation to raise long-term productivity.
- Year 3 → Production scaling to support a broader portfolio.
- **Strategic intent:** Build operational efficiency and future readiness.

Financial Investment Strategy (Debt Management & Sustainability) (OECD, 2025)

- Year 1 → Took on loan financing (£600m) to fund early R&D and capacity build.
- Year 4 → Repaid loan, reinforcing financial credibility & sustainability.
- **Strategic intent:** Manage capital structure for long-term solvency.

Consolidation & Leadership Strategy (Harvard Business Review, 1975)

- Year 4 → Invested in premium positioning (Tialon), brand marketing, and balancing production to minimize inventory.
- **Strategic intent:** Strengthen brand equity and market leadership after expansion.

Strategic ROI Pattern (CohnReznick, 2024)

Short-term (Years 2–3):

- Gained market share through pricing adjustments.
- Expanded into new customer segments (over-55s, fleets).

Medium-term (Years 3–4):

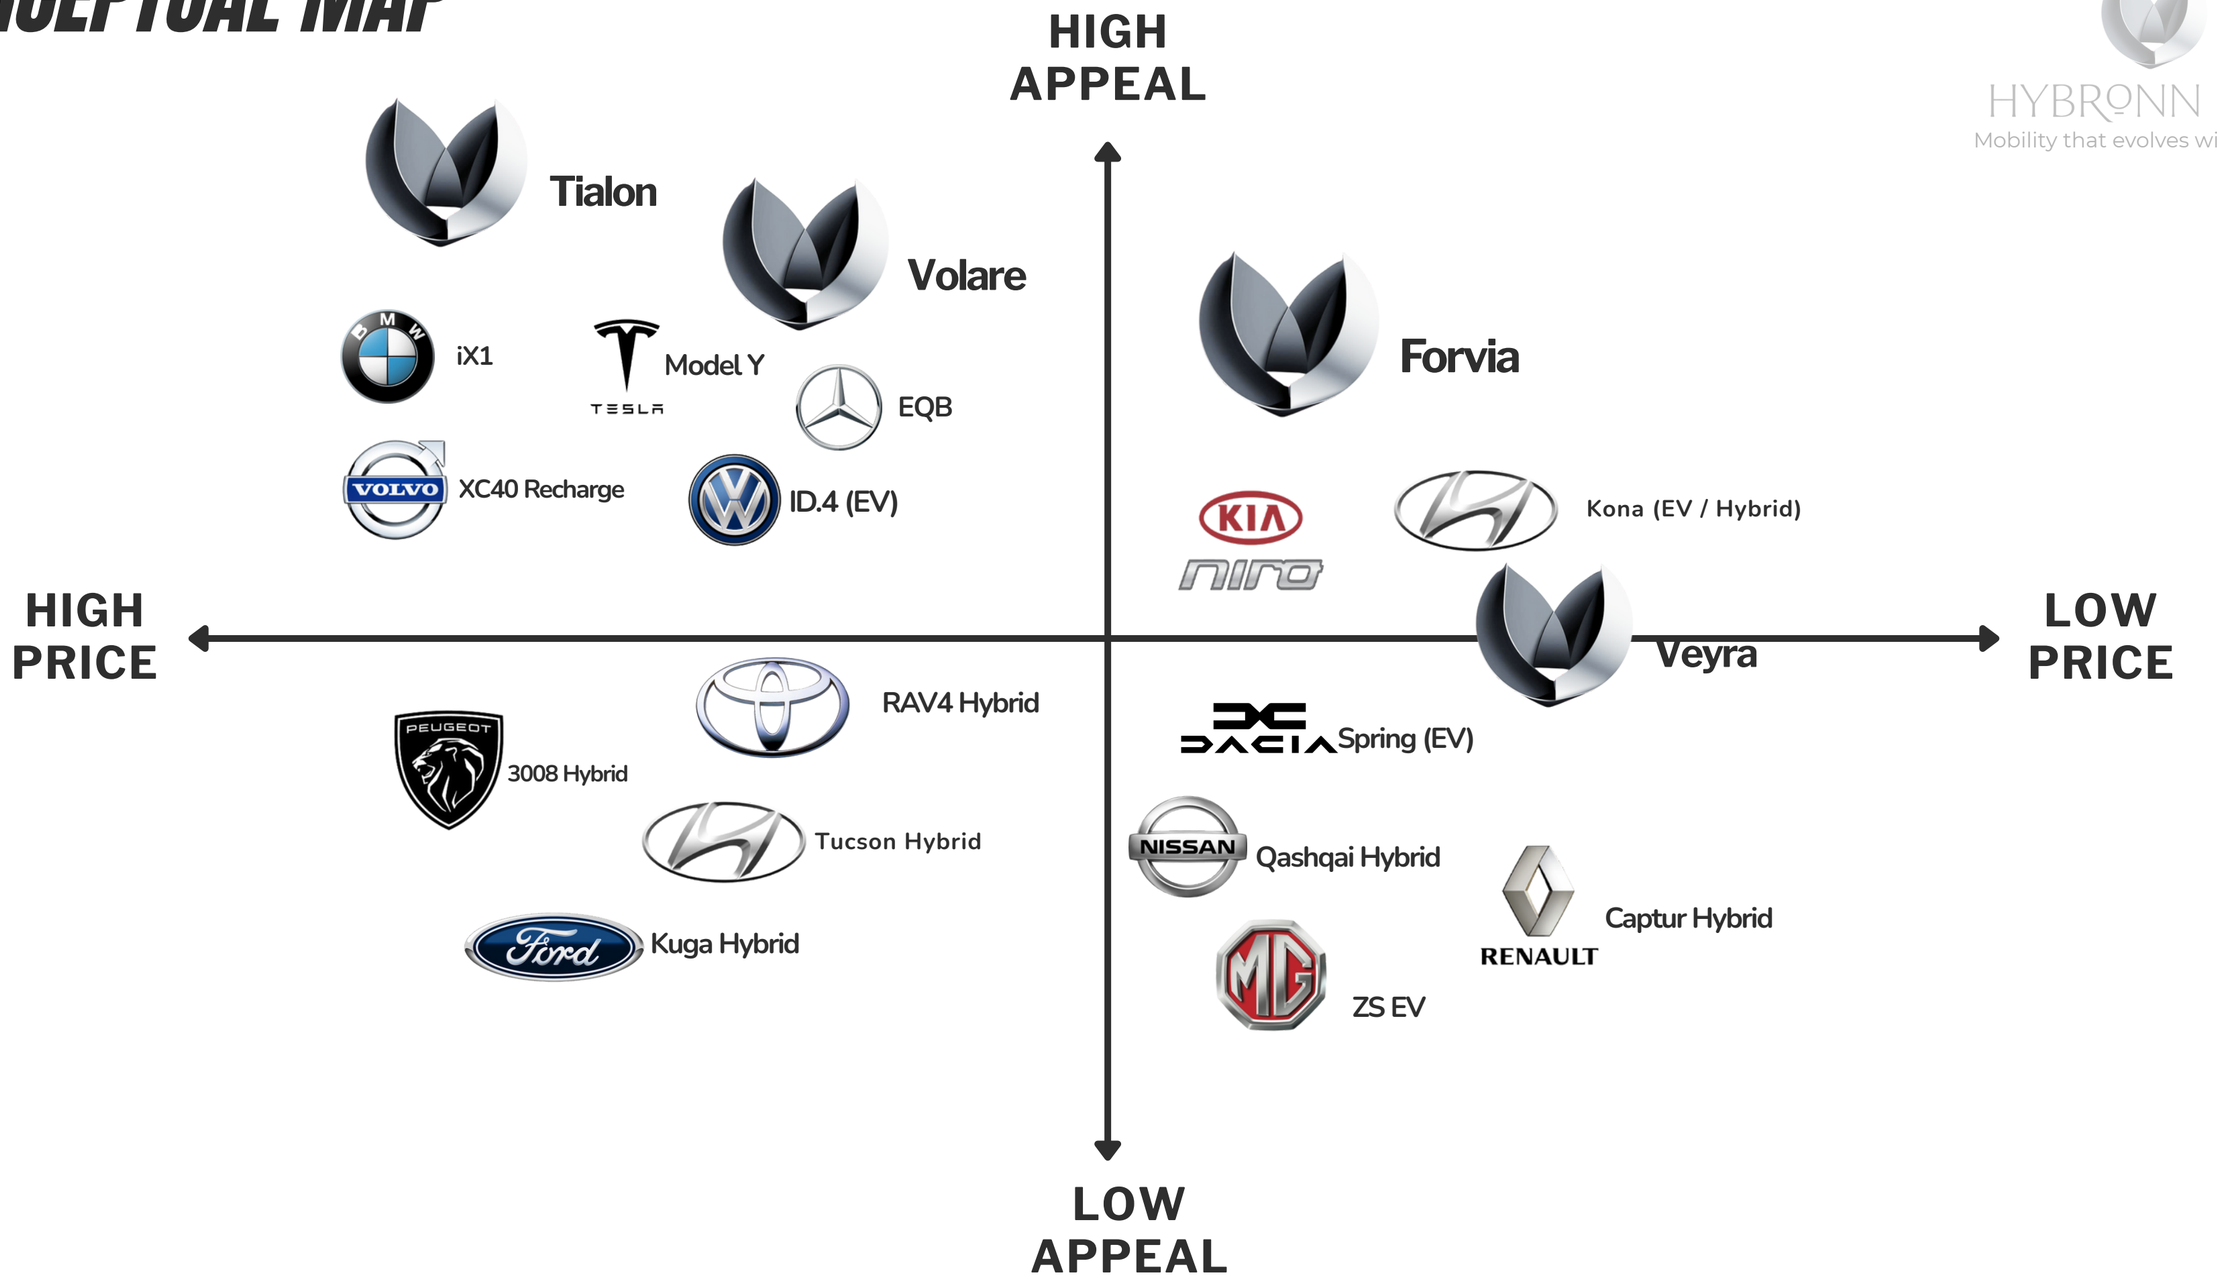

- Profitability improved with higher sales volumes and diversified portfolio.
- Retrofit grant investment delivered returns via innovation and differentiation.

Long-term (Year 4 onward):

- Established strong brand leadership in hybrids and fleet solutions.
- Scaled retrofit kits as new revenue stream.
- Achieved financial sustainability with full loan repayment.

PERCEPTUAL MAP

HYBRONN
Mobility that evolves with you

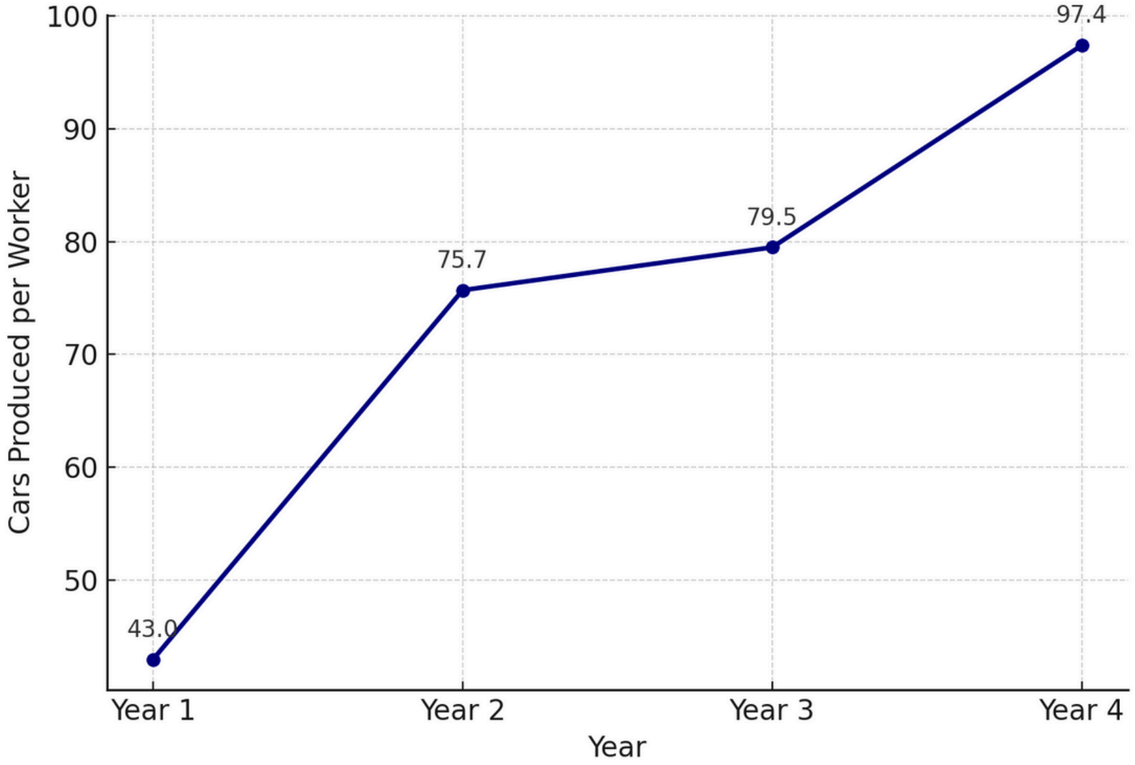

PRODUCTIVITY AND WORKFORCE

HYBRONN
Mobility that evolves with you

- **Workforce capped at 4,000** → flexibly allocated across models
- **Productivity doubled:** 42.9 → 97.4 cars/worker
- **£2–3m/year training** → skills ↑, warranty costs ↓
- Wages above industry average (£715–730 vs £715 avg) → stable morale, no strikes
- **HR Theories:** Becker (Human Capital), Herzberg (Motivation)

Worker Productivity Over 4 Years

Average Productivity

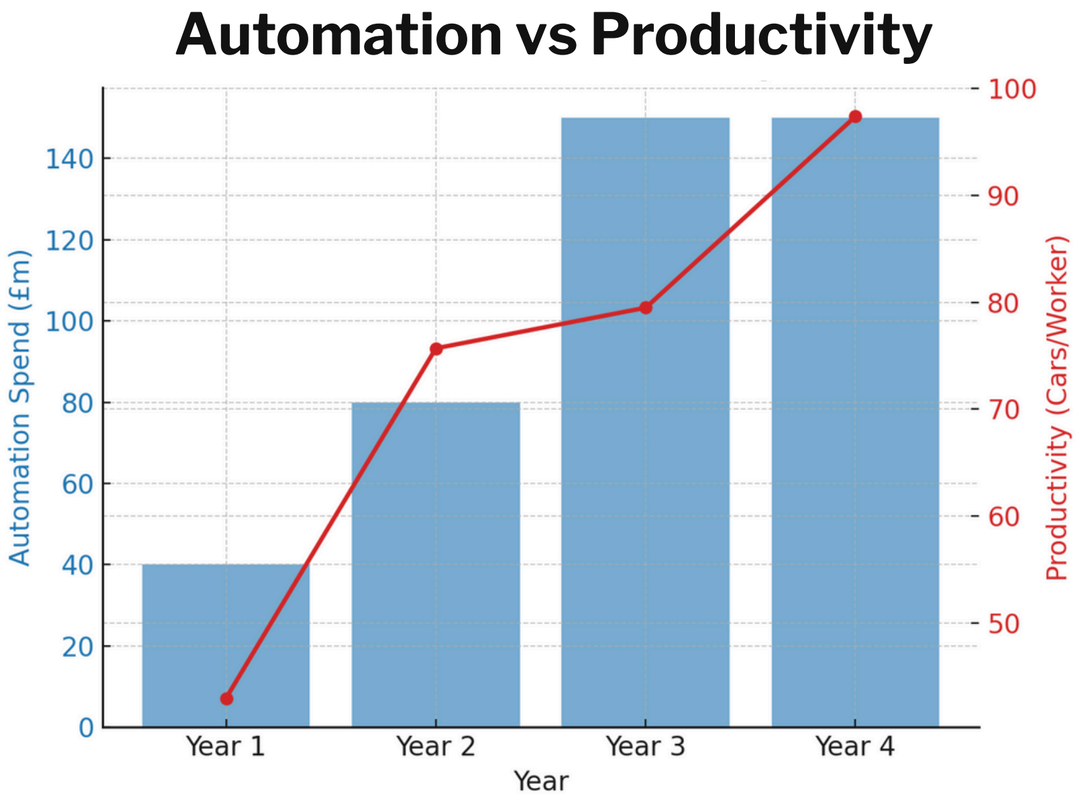

71.42 Cars Per Worker

Potential: 71.29

COST, AUTOMATION, SALARY STRATEGY

HYBRONN
Mobility that evolves with you

- **Cost structure:** Fixed vs variable costs balanced (wages, training, automation = fixed; materials = variable).
- **Automation spend:** £40m → £150m → 25–30% automated by Year 4.
- **Workforce costs:** Wages £715–730/week (above industry avg) + £2–3m/year training.
- **Impact on performance:** Higher quality, fewer defects, stable workforce morale.
- **Financial implications:** Margins squeezed short-term, but efficiency & differentiation supported long-term growth.
- **HR Theories:** Kotter (Change), RBV (Workforce as strategic asset).

Automation ratio

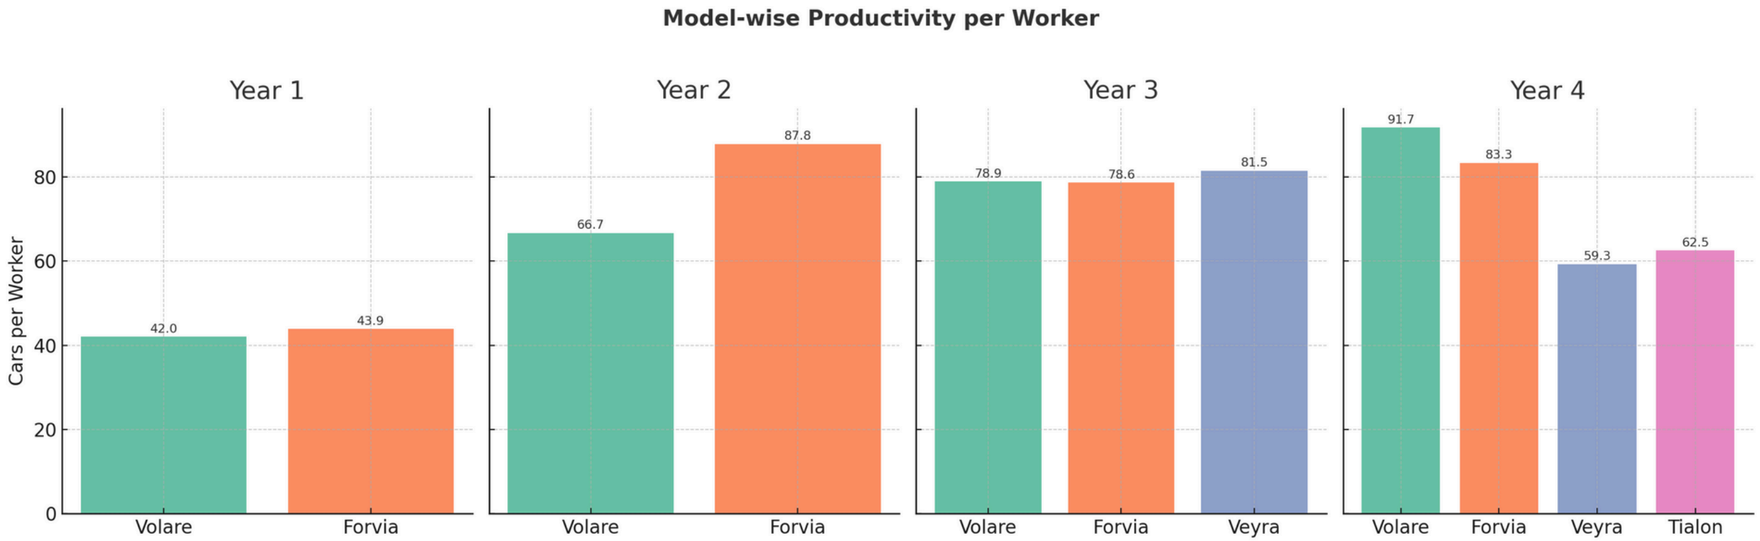

Actual: 21.32%

Defined: 20%

SALES OVERVIEW

HYBRONN
Mobility that evolves with you

- **Volare & Forvia consistently sold out** → workforce shifted to meet demand
- **Veyra underperformed** → tied up workers in low-margin production
- **Year 3 overproduction** (Volare 120k, Forvia 110k) strained labour & cash
- **Year 4 Tialon launch** → workforce at 4,000 + automation = success
- **HR Theories:** Delery & Roumpi (HR Advantage), Maslow (Security & Morale)

FUTURE VIABILITY

HYBRONN
Mobility that evolves with you

Strategic Coherence
Effective Implementation: Hybrid-first focus delivered strong market presence.
Dynamic adjustments: Pricing, promotions, and portfolio sequencing adapted to demand.
Impact: Brand positioned as trusted fleet partner & retrofit innovator.

Quantitative Viability (KPIs)
Productivity: Doubled (42.9 → 87.5 cars/worker).
Gross Margins: Sustained in 25–34% range despite price pressures.
Portfolio Strength: Core models (Volare & Forvia) captured consistent share (~2–3%).
Innovation Investment: £50m grant ensures long-term retrofit and EV transition.

Future Strategy Recommendations
Scale Retrofit Kits → expand B2B fleet partnerships.
Accelerate EV R&D → leverage hybrid expertise for BEV leadership.
Focus Portfolio → double down on Volare & Forvia, refine premium/value offerings.
Expand FleetOS Services → lock in customers with compliance & efficiency tools.

Future Growth & Investment Plans
Sustain Hybrid Leadership: Consolidate brand as Europe's hybrid-first mobility provider.
Invest in BEV Readiness: Gradual shift from hybrid dominance → EV expansion.
Optimize Capital Allocation: Channel funds into R&D, automation, and digital marketing.
Long-Term Vision: Hybronn → Europe's sustainable mobility partner, bridging hybrid today to EV tomorrow.

FINAL REFLECTIONS

HYBRONN
Mobility that evolves with you

Strategy and intent
We pursued an innovation-led growth strategy, focusing on hybrid technology, automation, and retrofit kits, supported by capacity investment, careful debt management, and premium brand positioning. The aim was to differentiate through technology rather than price.

Implementation and adjustments
The strategy was largely implemented, though we made tactical adjustments—such as pricing changes in Years 2–3 to capture market share and production shifts in Year 4 to control inventory. Marketing spend was also increased to reinforce premium positioning.

Challenges
Adjustments created some trade-offs: pricing actions risked weakening our premium positioning, debt reliance carried short-term financial risk, and high R&D spend delayed returns.

Future viability
Despite these challenges, the strategy proved coherent. By Year 4, we repaid loans, expanded market share, and established leadership in hybrids and fleets. Balancing strategic consistency with flexibility will be key to sustaining long-term competitiveness.
